BPSQuant — profile pictures

Square avatars for every BPSQuant account. Most platforms crop to a circle, so the mark is sized to sit well inside it — nothing is clipped at any crop.

The three versions

Navy — use this one
Highest contrast. Reads at any size, on light or dark pages.

Gradient
Matches the website exactly. Softer at small sizes.

White
For directories and documents that want a light logo.

Transparent
No background. For slides and print — not for profile pictures.

Circle crop — what the platforms actually show

Navy

Gradient

White

Pre-cut circle file (transparent corners)

Navy at the sizes people really see

96 — profile header

48 — post / comment

32 — inbox row

24 — chat

16 — smallest

On a light page and a dark page

Navy on white

Navy on grey

Navy on dark

White on dark

Which file to upload where

Account	Wants	Upload
Google Business Profile	720 × 720	`bpsquant-avatar-navy-1024.png`
Google Workspace / Gmail	250 × 250 min	`bpsquant-avatar-navy-512.png`
LinkedIn company page	300 × 300	`bpsquant-avatar-navy-400.png`
Facebook / Instagram	170 × 170 shown	`bpsquant-avatar-navy-512.png`
X / Twitter	400 × 400	`bpsquant-avatar-navy-400.png`
WhatsApp Business / Zalo	any square	`bpsquant-avatar-navy-512.png`
Email signature	small, often on white	`bpsquant-avatar-navy-circle-512.png`
Slides, letters, print	no background	`bpsquant-mark-transparent-1024.png`

Two things to watch

Upload the biggest file	Every platform downsizes well and upsizes badly. When in doubt send the 1024.
Never upload the transparent one as a profile picture	Transparent corners go black on dark themes and white on light ones, so the avatar changes shape depending on where it is seen. Use navy.
